Summary

Hi, I'm Sugeeth! I love to innovate and make cool new projects, and almost experiment a bit too much. I'm deeply passionate about experimenting with new ideas and pushing projects beyond the basics.

- I've worked with VEX Robotics kits and toyed around with them to make basic projects, like remote controlled cars and floor cleaners.
- I've also done a few software projects like creating automation-based methods to lock apps using shortcuts, worked with basic APIs, scraping web pages for download links, played with a lot of documentation software.
- Additionally, I've created quite a handful of websites, using platforms like Wix, Craft.do among others.
- I've also worked on graphic design, video editing, soundtrack editing and won the prize for the best overall graphic design in Class 11 during team-based Culturals event in DBX Egmore.
- I've also done some independent volunteer work and project work, and I've set up structures and created mechanisms, initiatives and organizations for various different purposes.
- I personally like to tinker with operating systems, troubleshooting Windows issues, Linux installs, ChromeOS Flex and myCloud OS 5 NAS.

I'm a curious explorer and would be willing to work on new projects that would strengthen my skills, earn me some new skills, create connections among others.

Junior Technical Consultant

September 2025 - February 2026 (6 months)

Chennai

I joined as a probationary member in September 2025.

Currently part of LLM Team doing research.

Project Troopers

3 years 1 month

Asst. Head of Election Committee

January 2025 - Present (1 year 6 months)

Chennai, Tamil Nadu, India

In order to provide equitable representation and prevent conflict of interest, I relegated myself to the post of Asst. Head of Troopers Election Committee.

Around this time, Faheema Nasrin became head of the Election Committee upon expiry of my tenure.

I have defended the independence of the Election Committee from the Board of Directors in multiple discussions internally.

I have also promoted the role of TEC with the Project, influencing the members to join the TEC.

I also built a website for the Second Unified Elections of Project Troopers, where we opened up positions of all elected posts for vote.

Department Manager, Department of IT Operations

June 2023 - Present (3 years 1 month)

I have constantly helped to create and maintain the website for Project Troopers. The original hub was implemented via Craft, @ troopers.craft.me

However, via Board Recommendation, I ended up changing the website platform to GitBook and using GitHub for the base repository of markdown based pages.

Why not our own platform?

Live collaboration was one of the key focus points for the Hub, and it should be easily editable by members if needed.

I also created the "Status Update 2.0" Apple iOS Shortcut for personal use and Project Use to send reminders among others to the members via WhatsApp and hosting platform, complete with config saving and dynamic recovery with manual backup options along with an extensible interface.

Co-Founder

June 2023 - Present (3 years 1 month)

Chennai, Tamil Nadu, India

Project Troopers was an initiative to help the friends of my class easily access notes etc...

Due to some past confrontations internally, there was a need to create a well-protected group that would help students in the best way possible.

Thus, Project Troopers was born. It started off as a WhatsApp Group, then expanded to accomodate a Website, then inducted members from across India and ended up with a full blown non-profit non-governmental thing with an organisation-like structure.

Collaborator In-Charge (Executive Appointment)

September 2024 - April 2025 (8 months)

Chennai, Tamil Nadu, India

Due to my expertise in handling Project Troopers matters, the Second Board Session voted to make me the CIC. Though I held a post in the Election Committee concurrently, they found out technicalities within the rules of the Project Troopers and used them to make me, the CIC.

Relatively quieter period, but we solidified some more structures, created more rules and regulations, and enforced administrative shutdowns to help the members to study for their exams.

Troopers Election Committee Head, Liaison to Board from the TEC

April 2024 - December 2024 (9 months)

Chennai, Tamil Nadu, India

As per the then interpretation of the Legal Stature, only admins of Project Troopers who were not in the Board or ArbCom could kickstart the Troopers Election Committee (TEC). Since I resigned from the CIC post, I took up the mantle of Election Committee Head.

In order to facilitate coordination between core institutions of Project Troopers, liaisons to the Board were introduced for every autonomous body within Project Troopers. I also took up the post and ardently participated in the Board affairs.

I created the TECRR 2024 (The Election Committee Rules and Regulations), and played a pivotal role in drafting the DOPA 2024, TACRR 2024, IoFA 2024.

I helped the TEC to conduct the first ever elections to the Board of Directors. It took around 57 days to conduct due to the pivotal changes made within the organization.

Collaborator In-Charge, Director

February 2024 - April 2024 (3 months)

Chennai, Tamil Nadu, India

Once the second year of operations were approved, there was a vote on turning Project Troopers into a type of representative democratic organization, where the members could elect the directors who would form a Board that would run Project Troopers, among others. This vote was internally called the "5-point reform"; and with it, the structure of Project Troopers was revamped.

Originally, to guide this reform, a few prominent members were invited to form the Board of Directors. The Board started setting up structures to ensure that Project Troopers would get proper sustainable structures to ensure stable expansion, if needed. The Board also made the decision to implement the Legal Stature of Project Troopers, limiting powers and establishing internal institutions like the Election Committee, Arbitration Committee, Board, Regiments, Divisions etc.

The head of the Board was known as the Collaborator In-Charge (CIC). I was invited to head the Board during this transformation.

Around April 2024, base structures were almost set up and thus I resigned to pave way for the first internal elections.

Sherpa

June 2023 - March 2024 (10 months)

Chennai, Tamil Nadu, India

The most important phase in the creation of the Project was the incubation. The idea of having an organisation of people to protect the educational group from external influence was a failed idea around that point due to the legal stuff...

Thus, I had to garner goodwill from the members and show them how great the idea would actually be, if executed properly.

So we worked, and we cooked up some really important cornerstones for the original structure of Project Troopers.

1. All decisions were daily plebiscites.
2. Emphasis on Openness, Honesty and Simplicity.
3. Single rule as the basis of all interactions: Be Civil, Moral and Humane, while keeping Troopers secrets.
4. Materials and Handwritten Notes, Announcements and Reminders were shared freely by everyone.
5. Speech as a tool to inspire.

It became a resounding success, so much so that the members wanted it to continue for another year...

V-Vortex

Student Coordinator

December 2025 - January 2026 (2 months)

Cyber Club - DBX Egmore

1 year 10 months

Netizen (Member)

August 2023 - May 2025 (1 year 10 months)

Chennai, Tamil Nadu, India

Back then, I was invited to be a member of the club by the original committee that instituted the Club.

Cybernaut

April 2024 - July 2024 (4 months)

Chennai, Tamil Nadu, India

Tech Monitor for my Class, appointed the homeroom teacher

Graphic Designer

August 2023 - August 2023 (1 month)

Created the Logo of Cyber Club, created the design for the badges of different members of the Club...

Selected the colour palatte for different tiers of membership.

#Project_Initiation

Jugzards

2 years

Transfer Negotiator

January 2025 - January 2025 (1 month)

Chennai, Tamil Nadu, India

By April 2023, the Jugzards Initiative no longer had the same focus as Project Troopers and it was becoming redundant. Most of the volunteers for Project Troopers and Jugzards were the same people...

Thus, I spoke with my co-founder and negotiated with the Project Troopers representative @Sai Deepan (Acting CIC) to transfer Jugzards over to the common control of Project Troopers, via agreement. I helped to draft most of the agreement.

The agreement was executed around Jan-Feb 2025, and thus Jugzards has shut down and its assets/archives are now Project Troopers purview.

Co-Founder

February 2023 - January 2025 (2 years)

Chennai, Tamil Nadu, India

My friend and I started a non-profit non-governmental organization to help students get access to educational resources faster and sometimes showcase our own materials. It was called the "Juggler Wizards Open Source Group". We started it by developing our own prep material for Class 10 "Human Eye and the Colorful World", and we wanted a brand name to be associated with it rather than our actual names....

Over time, we started archiving some of the materials on the internet. But then the interest died out...

Don Bosco School of Excellence. CBSE

1 year 5 months

Advisor to the New Committee - The Corridor Initiative

April 2024 - January 2025 (10 months)

Chennai, Tamil Nadu, India

The Corridor Initiative got a new team behind it after the first series got over, in order to provide more opportunities to everyone.

I was made a strategic advisor and caretaker for the team while they transitioned into the new year with a new series.

Soon enough, I was allowed to remain as a full time advisor and contributor for the Initiative.

Co-Editor and Head of Design - The Corridor Initiative

September 2023 - May 2024 (9 months)

Chennai, Tamil Nadu, India

Initiated and Worked on the Corridor Initiative, a fortnightly newsletter with information and intellectual activities for the students.

I was Co-Lead of the editorial desk and Head of the design for the entirety of Series 1 (Academic Year 2024-2025).

Successfully issued 8 editions of the newsletter, with the help of a great team.

The newsletter would be posted on the noticeboard in the Corridor near my class.

Designer - Word of Day (Vocabulary Dynamic Wallpaper)

September 2023 - October 2023 (2 months)

Chennai, Tamil Nadu, India

Designed the Base Template for Vocabulary (Word of the Day), with integration to the class timetable for large scale implementation...

The underlying design and method was used for two years...

Project was done under the tutelage of the homeroom teacher.

Provided future continuous tech support till February 2025 on this issue.

HSAG Ingeniousity

Founder

August 2021 - July 2023 (2 years)

Chennai, Tamil Nadu, India

After AGNBOC fell, I created a brand new company that would remain separate from AGNBOC and would be a front to showcase all of my works, like creating shortcuts, releasing books, making sheet music, Youtube Channel Techneeka among others.

Finally, we incorporated AGNBOC into HSAG Ingeniousity and added it's contents to our arsenal.

At the end, I closed it as it became too much of a hassle to handle.

AGNBOC (All Good No Bad Organisation Club)

Co-Founder

August 2017 - March 2022 (4 years 8 months)

Chennai, Tamil Nadu, India

Originally it was started as an interest group for my friends to help upskill and grow ourselves.

I had always wanted to become a part of "something bigger than myself", and I believed back then that this was the best way to organise ourselves and develop great things, like newsletters, ad platforms etc.

So we wanted to focus on the good things in this world, and created a "club" of sorts to do just that.

I started this along with @Eric Melwin.

Flash 4 Friends

6 months

Closing Coordinator

August 2020 - September 2020 (2 months)

Chennai, Tamil Nadu, India

Due to some internal fallout, the members of Flash 4 Friends got dissuaded from creating content.

Towards the end, @Freddin Justin held an online meeting to discuss about the future of the group. There it was unanimously decided to delete the channel, and close the group.

Thus, we ended up deleting accounts, the youtube channel, instagram and facebook handles etc.

Video Editing and Content Strategist, MiniMakerzz 5.0

June 2020 - August 2020 (3 months)

Chennai, Tamil Nadu, India

Continued creating content for YouTube by finishing the COVID-19 series.

Reorganisation

June 2020 - June 2020 (1 month)

Chennai, Tamil Nadu, India

Around the time, we believed that the channel got hacked by a rival YouTube channel by another colleague.

Thus we deleted the first youtube channel and associated Google Account, and restructured the organisation by focusing all of our efforts onto creating a new YouTube channel and reuploading the old content from the deleted channel.

The new channel was unironically called "MiniMakerzz 5.0".

Content Creator and Strategist, MiniMakerzz

May 2020 - June 2020 (2 months)

Chennai, Tamil Nadu, India

We started off the YouTube Channel, MiniMakerzz. Originally, we posted on hot topics and informational stuff at time, like "World Capitals" and "COVID-19".

Founding Member

April 2020 - May 2020 (2 months)

Chennai, Tamil Nadu, India

Flash 4 Friends was a project that took a long time to plan and execute. The idea was to create a platform for me and my friends to venture into creator roles like running a YouTube Channel, Graphics Design etc.

We started planning to create this project back in October 2019, where would hold group discussions over lunch on the feasibility of this idea. Back then, the discussions were more on how to build a product-based company rather than services; like creating products based on paper-based craft work, projects with tech components like using Arduino etc.

Around the start of 2020, the talk shifted to service-based opportunities like content creation due to some internal heat on the base execution phase of "working as a team" on products.

Then the 2020 lockdown hit. Over a series of online meetings, we quickly formulated a plan to create a YouTube channel and a blog. The initiative was spearheaded by @Freddin Justin and @Eric Melwin, thus they laid the foundations to start the "brand".

Meanwhile, I was lobbying internally for a power structure that allowed F4F to be associated with my brand AGNBOC (as it was intermittently running with overlapping members around that time).

We then started building a website and a YouTube Channel under the sub-brand MiniMakerzz.

Don Bosco School of Excellence. CBSE

Co-Founder and Co-Editor - The DBXpress Sharks

June 2018 - July 2018 (2 months)

Chennai, Tamil Nadu, India

My friend Eric and I wanted to create a Newspaper that was to be published within the school and would generally talk about school events. We originally tried this out within the scope of our class... It failed once, and we put it off until Jun 2018 to try once again... This time it ended being a success...

Then, we spoke with our school principal about expanding this initiative to the whole school.

He gave us permission to do so, and suggested some general reforms for the newspaper:

1. Standardising the name for better PR.
2. Taking specific topics of interest as focus points for the newspaper.
3. Prioritising higher quality content than quantity.

So we set off to do just that, and ended up pushing out multiple editions of this newspaper for our block.

Unfortunately, we couldn't continue publishing this due to personal reasons, and this "initiative" almost died off...

But, our then principal, took this opportunity and turned this idea into a new "newsletter" called DBXpressions, released on the Annual Day of that same year. It was a wholly owned school published newsletter that was maintained by the teachers and showcased content by all stakeholders of the school.

Thus, this idea lives on in spirit even today... that too in a new form!!
